# The FIRESTATION Support Action

# Outcome from the FIRE “Wise Men” Report

Towards a collaboration and high-level federation structure for the FIRE Facility

# The FIRE Architecture Board

- New FIRE facilities are oriented towards services in addition to networking
- The FIRE Architecture Board was launched in order to ***coordinate common actions and developments among the new FIRE facilities projects*** with the following objectives:
  - Better respond to user requirements willing to use FIRE facilities –including when needed by supporting extensions to existing facilities
  - Work in common on a few issues such as a FIRE high-level federation model; a FIRE portal; sustainability and business models; etc.

# **FIRESTATION is about FIRE coordination and support to FIRE stakeholders**
